

Annual Planning Day

How would you like to spend a day dedicated entirely to supercharging your business (and life) for the year ahead?

Together we will work through your ideas and create your roadmap for the year, ensuring you have time and space to enjoy what matters most to you.

I'll provide practical strategies and structure as well as the resources and connections to make it happen.

HOW IT WORKS:

We will kick off with a review of your business over the last 12 months. What's been working, what hasn't, what isn't worth continuing and gathering those learnings to move your business forward.

With a snapshot of where things are at right now, we will then get really clear of where you want to be in 12 months time and set your vision.

Then we create your roadmap for your business and life.

We will flesh out your year, set specific, measurable goals and break those goals down into actionable tasks with a realistic timeline to turn your vision into reality.

I'll workshop opportunities with you, remove roadblocks and identify the right resources and systems to enable you to flourish in your zone of genius.

You will walk away feeling energised and confident with a tailored plan unique to your business and the tools to bring that plan to life.

We also have an Activation Call within weeks of our planning session where I will provide you with that all important momentum and accountability to stay on track with your plans.
